Sapienza Università di Roma

About

Master's student in Computer Science at Sapienza Università di Roma, specializing in AI, Deep Learning, NLP, and Computer Vision. Experienced in building and deploying practical ML solutions, from semantic document comparison APIs like DocDelta on AWS to lossy text compression pipelines using Transformers.

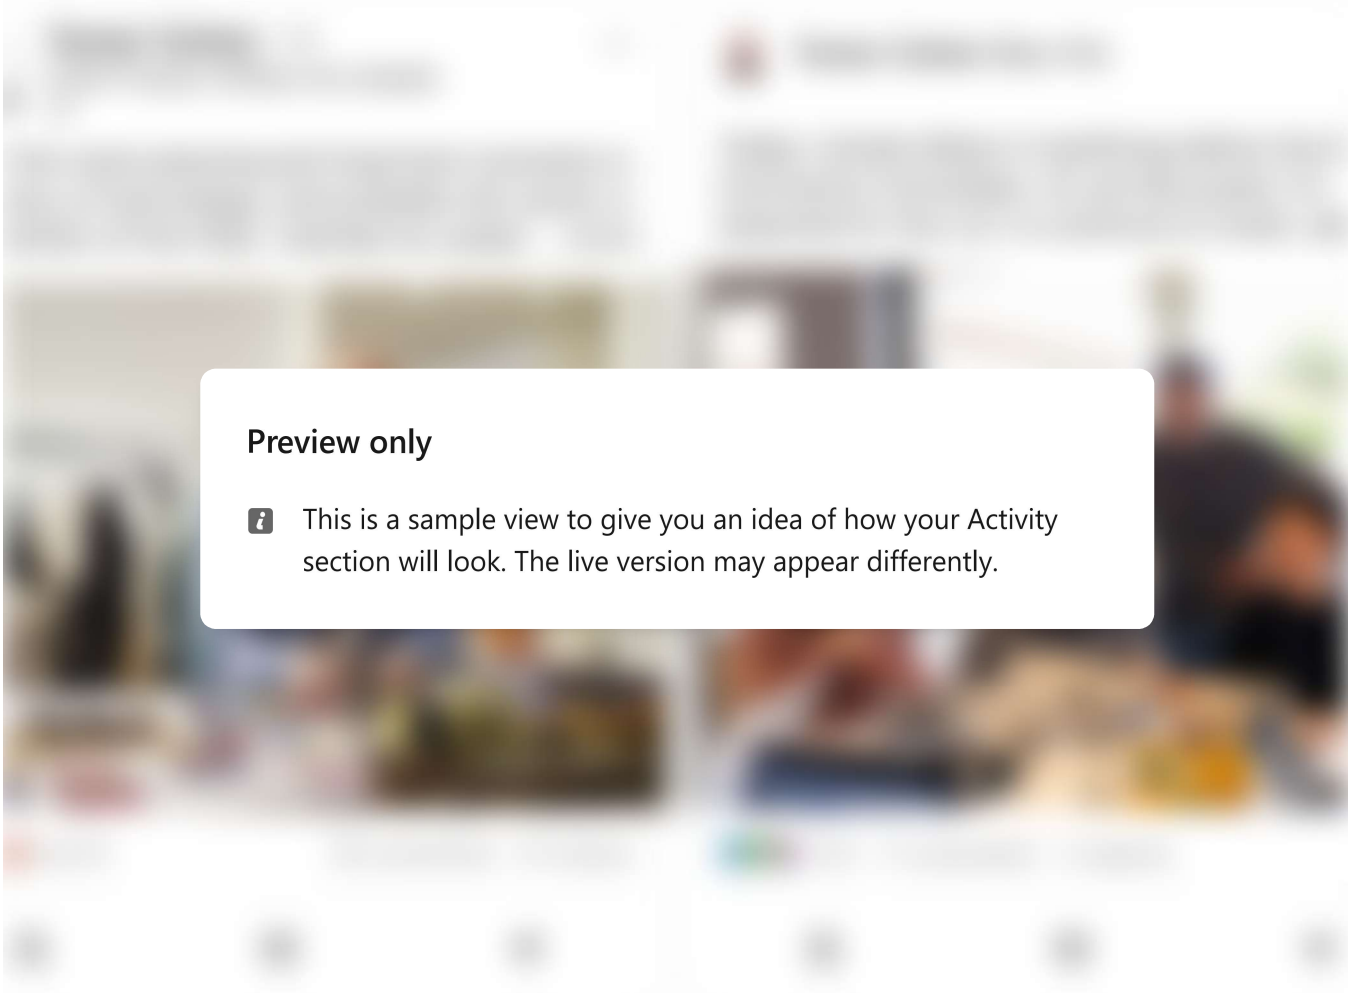

Published a peer-reviewed paper on ML models for air quality prediction, and skilled in Python, PyTorch, TensorFlow, FastAPI, Docker, AWS ECS, and cloud monitoring.

solutions in computer vision and NLP.

Projects

DocDelta

-

- Built and deployed a production-ready ML inference API using FastAPI for scalable semantic document comparison
- Dockerized NLP pipeline and deployed on AWS ECS (Fargate)
- Designed stateless REST endpoints for semantic document comparison
- Optimized CPU-only PyTorch inference for low-latency cold starts
- Implemented cloud monitoring using AWS CloudWatch

LossyTextCompressor

-

- Implemented ML pipeline for semantic text compression using Transformers
- Evaluated compression–quality trade-offs using BLEU, ROUGE and cosine similarity
- Built modular, reproducible experiments in Python
