Swati Aggrawal

New Delhi, India | swatiagg357@gmail.com | linkedin.com/in/swatiaggrawal | github.com/swatiaggrawal

PROFILE

Analytical and detail-oriented graduate with a strong research and problem-solving background, seeking a hands-on business internship. Proven ability to work independently under tight deadlines, structure ambiguous problems, and communicate technical findings clearly to non-technical stakeholders through reports and presentations.

EDUCATION

M.Sc., Computer Science — Sapienza Università di Roma, Italy *May 2026*
B.Tech, Computer Science Engineering (AI/ML) — Sharda University, India *July 2023*

CORE STRENGTHS

- Business & Market Research — literature reviews, competitive/technical landscape analysis, structured reporting
- Data Analysis & Reporting — turning raw/technical results into clear metrics and narratives for decision-makers
- MS Excel & PowerPoint — data organization, summary decks, and client-ready presentations
- Proactive Execution — delivers complete, working outputs independently and under deadline pressure

RELEVANT EXPERIENCE & PROJECTS

SHL Assessment Recommender System — Independent Project *2026*

- Scoped, built, and deployed a full recommendation system end-to-end within a 2-day deadline, mirroring real-world time-boxed delivery constraints
- Documented the project for a recruiter/non-technical readership, translating technical architecture into a clear, business-readable README

Live Demo: shl-assessment-recommender-7hy0.onrender.com

M.Sc. Thesis: Continual Learning on ViTs — Sapienza Università di Roma *Nov 2025 – May 2026*

- Designed and ran a structured research study under faculty supervision, achieving a 90.59% average accuracy outcome and a ~97% reduction in a key error metric versus baseline
- Presented complex quantitative results in a clear, defensible narrative for academic evaluation — directly applicable to business reporting

Code: github.com/swatiaggrawal/Thesis-Vision-Transformers

Knowledge Copilot: Grounded RAG Chatbot — Independent Project *2026*

- Built an end-to-end retrieval-augmented chatbot with a modular 4-stage pipeline, working within tight free-tier infrastructure constraints

Code: github.com/swatiaggrawal/RAG-Chatbot

Live Demo: rag-chatbot-new.onrender.com

DocDelta: Document Intelligence & Comparison Platform — Independent Project *2026*

- Developed and deployed a semantic document comparison API on AWS ECS/Fargate, translating a technical concept into a usable, client-facing tool

Code: github.com/swatiaggrawal/DocDelta

Metal Defect Detection using Computer Vision — Independent Project *2026*

- Built an automated image-based classification system achieving 97.22% test accuracy across 6 defect classes

Code: github.com/swatiaggrawal/Metal-Defect-Detection

PUBLICATION

Machine Learning for Air Pollution — IEEE Conference Publication *2023*

- Reviewed machine learning approaches for air-quality evaluation and prediction, including Random Forest, SVM, Decision Trees, ANN, and clustering methods across environmental and regional applications
- Examined applications of remote sensing, satellite-derived AOD data, and IoT sensing networks for localized air-quality monitoring

DOI: doi.org/10.1109/ViTECoN58111.2023.10157028
